Resources Used for UCSBB

This is here to acknowledge the resources we used when creating UCSBB

- https://www.npmjs.com/get-npm
  - This was used to install NPM (Node Package Manager), which is used for the installation process of running the app
- https://expo.io/tools
  - Gives information on Expo CLI (command-line interface), Expo Client, and other Expo Tools
- https://reactnative.dev/docs/getting-started
  - This is where we learned how to download and use React Native
- https://github.com/react-native-community/react-native-maps
  - This is the API we used for the maps function of our app.
- https://stackoverflow.com/
  - This was used to troubleshoot all the problems and troubles we faced when using React Native
- https://firebase.google.com/
  - We used Firebase for our database of bathroom data
